

## Multiple Ages Flexibility - Homeschool

(Also see "Money Saving Way to Order" on the next page.)

### You can teach multiple ages together.

- Each school-year-long themed course comes in grade groups 3-4, 5-6, and 7-8.
- Grade groups indicate student age/grade in school, **not** Spanish experience.
- **There is flexibility in using the grade groups.** Examples:
  - Use a grades 3-4 level with children in grades 3-5.
  - Use a grades 5-6 level with children in grades 4-7.
  - Use a grades 7-8 level with children in grades 5-8.
- It is 3rd graders that need the grades 3-4 level the most. So, be sure they work from that level.

Also, the lessons in grade groups 5-6 and 7-8 are very similar, so it is easy to use them interchangeably and successfully with students grades 4 and up.

**You can tandem in children younger than 3rd grade** to learn many things with your older children. While the curriculum is not designed specifically for younger children, there are many games and activities they can do.
